

***CESCO™ In-Line Magnetic Separators***

**MAGTRAP MODEL 135**

***For liquids, purees, and non-fragile solids***

This most popular and effective Cesco MAGTRAP has USDA approval (US Department of Agriculture Approved). Designed for liquids and slurries with chunks up to 0.5". In the exploded view, the product flows from right-to-left through intense, multiple, magnetic fields generated by the protruding tubes. Trash is held on the tubes, until the unit is cleaned. Units to 2" line size have five tubes, while 2.5" to 4" line sizes have seven tubes. The removable base makes the unit easily accessible for cleaning. Water jackets are optional.

- All 316 Stainless Steel
- Rare Earth Magnets Available To 300°F

**Applications**

These magnetic separators are typically used when processing beverages and juices, batters, chopped foods, custards, pulped fruits and vegetables, jellies, minced meats, sauces and soups, syrups, and other products where they are placed in front of pumps, screens, or mills to protect equipment from damage, or in front of fillers to ensure product quality.
