PUMP REMANUFACTURING PROGRAM

Our remanufacturing program consists of a COMPLETE remanufacture of your worn pump. This is not a repair...when we say remanufacture, we mean...your pump will undergo re-machining and include all-new internal and external parts, seals and elastomers regardless of their current condition. Waukesha U1, U2, Wright Process TRA10, TRA20 or Ampco ZP Series style pump (from 006 to the 520) to its original brand-new efficiency...guaranteed.

ADVANTAGES

- **Cost 30% less than a new pump**
- **One-year factory warranty**
- Remachine housing and cover to accommodate oversized rotors
- Two weeks turnaround from receipt of PO
- BRAND-NEW parts include: rotors, shafts, bearings, bearings retainers, lip seals, helical gears, rotor nuts, seals and elastomers
- Performance test before shipment
- Helical gears are stronger and run quieter than spur gears
- Three times stronger 17-4 PH shafts
- Stainless steel bearing retainers

- Powder coated finish on cast iron gear cases
- Possible adds: we will notify you if the body, cover, gear case, or ferrules are not service-able or if the pump requires excessive clean up
- Additional options are available, contact Harco for details

ALL Remanufactured Pumps Include:

- Remachined-body
- Gear case reconditioning
- Brand-new rotors, shafts and internal parts
- Cover reconditioning
